The Spillage Test Apparatus is used to make a spillage test on refrigerators. The container is filled with water and a displacement block is dropped into the water and creates an overflow.

Technical Specification

- Stainless steel container
- Plastic displacement block of 200 gram
- Pin for releasing the displacement block

Facts

Standard:

IEC 60335-2-24,
clause 15.102, Fig. 101

Components:

-

Weight:

Approximately 0,8 kg

Dimensions:

Approximately 160x80x70 mm

Supply:

-

Article number:

4020501
