The Sharp Edge Tester is used for determining the sharpness of edges of electrical equipment and other consumer products. A special tape is mounted on a spring-loaded arm and dragged over the sharp edge. The tape is then inspected for damages.

Technical Specification

- Rigid metal housing
- Hand held with ergonomic design
- Spring mechanism to provide correct force on mandrel
- Preassembled test caps with 3 layers of different tapes according to requirements in the test standard
- 50 test caps included
- The test caps are quickly changed after test – just slip a new cap onto the mandrel in seconds

Facts

Standard:

UL 1439
